Description

This is the Figma file for the same prototype file as submitted for my previous assignments.

The changes I added are:

- “Cat Tracker Collar Page - Added to Bag” screen
 - Added this page to make the full shopping and Add to Bag flow of the prototype cohesive. This screen increments the Bag icon from 0 to 1 in the top right corner.
 - The Shopping Bag procedure in the checkout only works if you are selecting the Cat GPS Tracker Collar as the chosen product.
- “Shopping Bag - Empty” screen
 - Empty shopping bag page, with a button to prompt returning to the Shop page.
- “Shopping Cart - 1 Cat Collar” screen
 - Shopping bag page with 1 Cat Tracker Collar item added to the cart. Corresponding prices and item details are populated, with the option to edit the item details on the page or remove it from the Shopping Bag.
